

# Hip Chains

Field Ranger – 6500M

The Fieldranger has a 6000 meter thread capacity for trouble free long range measuring. The rugged plastic case has strong metal hinges and hardware. A large window is bolted-in for checking how much thread is left. The counting mechanism is mounted on the top for easy viewing. It is sealed away from dust and moisture by internal baffles and a silicone rubber cover over the reset button. Te-loading is easy with this design. The correct pattern is printed inside the top. The thread passes through a tensioning mechanism to stretch it before measurement providing accuracy of 99.5%.

FIELDRANGER has been proven to provide years of reliable measuring in all kinds of field conditions.

*\*comes with one 6000m thread spool (white)*

## Thread refills:

Florescent Orange (6000m) – PS65/2-60

*\*paper spool*

White (6000m) – PS65/2-6N

*\*paper spool*

# Hip Chains

## Chaining Buddy – CB-M

Chaining Buddy Hip Chain is a distance measuring device that operates by measuring the length of string that is drawn from a spool that is within the instrument. The impact resistant, lightweight plastic case can be worn on the hip, freeing the hands for note writing or soil sampling. The biodegradable cotton thread is 9,000 feet long and comes in white or orange. Counter reads to 99,999 feet. The "Chaining Buddy" Hip Chain features a big, clear, window in the top that is permanently held in place with rivets. It has a unique counter mounting system that's designed to firmly hold the counter in place and locks in with a click.

*\*comes with one 2500m spool of thread (white)*

### Thread refills:

Florescent Orange; (2000m) – PS65/20

*\*paper spool*

White; (2500m)– PS65/2-25N

*\*plastic spool*

White; (2500m) – PS65/2-25N-P

*\*paper spool*
